

S.No: 7	Exp. Name: <b>Write a Java program to Delete and Remove characters using StringBuffer class</b>	Date:2023-09-16
---------	---	-----------------

### **Aim:**

Write a class `JavaStringBufferDelete` with a **main** method to delete characters from a string using `StringBuffer` class.

### **Source Code:**

JavaStringBufferDelete.java

```
import java.util.Scanner;
class JavaStringBufferDelete
{
    public static void main(String args[])
    {
        Scanner s=new Scanner(System.in);
        System.out.print("string: ");
        String a=s.nextLine();
        StringBuffer b=new StringBuffer(a);
        System.out.print("start index: ");
        int x=s.nextInt();
        System.out.print("end index: ");
        int y=s.nextInt();
        b.delete(x,y);
        System.out.println("Result after delete: "+b);
    }
}
```

Execution Results - All test cases have succeeded!

Test Case - 1
User Output
string: Hello world
start index: 0
end index: 6
Result after delete: world
